

WORLD BREASTFEEDING WEEK 2026 · SPECIAL LAUNCH

Breastfeeding the Infant at Neurodevelopmental Risk

THE BINR COURSE

A six-day evidence-based microlearning
course for professionals supporting preterm
and neurologically at-risk infants

COMPLETE COURSE ACCESS
FREE
for the first 50 registrations

WHY THIS COURSE?

Breastfeeding support may be more complex when an infant is preterm or has experienced HIE, seizures or altered muscle tone. Learn to recognise feeding readiness, coordination, positioning, stress signals and safety concerns—and when specialist assessment is needed.

SIMPLE DAILY LEARNING

5–10 min reading → clinical case → MCQs → detailed explanations

6 days · 12–18 minutes daily · fully online · text-based

THE BINR COURSE

What This Course Will Help You Do

NICE
ACADEMY

Redefining Clinical Learning

Across six focused modules, you will develop a more structured way of understanding and supporting breastfeeding when an infant has additional developmental or neurological risk.

See feeding through a neurodevelopmental lens

Understand feeding as an interaction between the infant's behavioural state, physiological stability, motor organisation and coordination.

Read the infant more carefully

Recognise readiness, regulation, fatigue, stress and other observable signals that influence feeding.

Individualise breastfeeding support

Move beyond a single standard approach and adapt support according to the infant's presentation and changing needs.

Make sense of complex feeding situations

Work through practice-based clinical cases involving infants who need additional feeding support.

Recognise limits and safety concerns

Identify when routine breastfeeding support may be insufficient and when further assessment or referral should be considered.

Build greater clinical confidence

Use structured observation and clinical reasoning to decide the safest and most appropriate next step.

WHO SHOULD ATTEND?

Pediatricians · Physicians · Nurses · Midwives
Lactation consultants · Allied health professionals

NICE Academy Certificate of Completion

Regular fee: ₹1,000 allied health · ₹1,500 physicians (GST inclusive)
